

# 2020 Election Early Voting Breakdowns - Presidential Battlegrounds

Aaron Kessler, Investigative Data Team

November 02, 2020

Bloomberg has an agreement with Catalist, a data company that works with Democrats and others, to compile counts of individual ballots cast before Election Day, either early in-person or by-mail, across 40 U.S. states.

The data is compiled from individual-level voting records in those states and is being provided to us each weekday morning. (Because of when certain states report their aggregate totals vs. individual voter-level information, you may see slight variations between Catalist's data and the AP's daily statewide tallies).

Our agreement allows us to use this data for stories and other news content across all platforms, provided we simply cite Catalist as the data source. If there are questions about what you see below, or you have ideas for other kinds of more targeted breakdowns that would help you in your stories or interactives, please drop a line at [akessler39@bloomberg.net](mailto:akessler39@bloomberg.net).

Below are summaries of the **ballots cast as of the morning of November 02, 2020**, in selected presidential battleground states...

Bottom line: there are huge surges among voters across the board in battleground states, particularly among young voters and minority voters. Meanwhile, in states where party affiliation is identified, Democrats continue to be well ahead of Republicans in their growth from 2016 in most of those states.

<b>WI</b>	567,722	472,180	133.3	142.0

### Age Groups

Growth in early voters by age groups to date, compared with the same point before the 2016 election. The table below shows the *percent change* in 2020 compared with 2016 at the same point before the election.

state	Percent Change from 2016					
	18-21	22-29	30-39	40-49	50-64	65+
<b>AZ</b>	2,987.7	97.3	78.6	60.0	49.1	18.4
<b>FL</b>	1,915.6	58.0	48.2	42.3	37.2	12.0
<b>GA</b>	4,584.2	107.7	97.5	73.0	53.2	24.1
<b>IA</b>	5,751.1	32.3	58.7	57.8	50.6	19.7
<b>MI</b>	16,732.8	471.8	772.2	683.7	372.1	46.0
<b>MN</b>	27,510.7	542.4	511.3	435.6	305.5	135.0
<b>NC</b>	5,495.7	73.0	72.6	57.7	43.2	15.4
<b>NV</b>	2,767.2	86.2	73.3	61.3	49.2	20.9
<b>OH</b>	4,281.5	98.9	135.7	121.4	88.9	36.8
<b>TX</b>	4,761.5	198.4	147.8	117.6	99.6	76.0
<b>WI</b>	5,556.0	194.0	204.4	175.3	134.7	74.3

One thing to note is that for the enormous percentage jumps in 18-21 year old voters, they almost all start from a very low 2016 turnout early. Though it's still notable of course just how much that group - traditionally unreliable for voting - has been gangbusters voting early this time.

Here below is an expanded table showing the particulars behind those percent changes around ages 18-21.

state	age	ballots cast at this point in 2016	ballots cast so far in 2020	difference	pct change
<b>AZ</b>	18-21	3,081	95,131	92,050	2,987.7
